GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

Dear Mr. McCoach:

APPLICATION 28599 OF ZEVIN; UNNAMED SPRING TRIBUTARY TO UNNAMED STREAM THENCE
SQUAW VALLEY CREEK IN SISKIYOU COUNTY

Before we may accept your vested rights' protest against Application 28599, it is necessary that we ascertain the location of your points of diversion. We note that you state your point of diversion covered by Statement of Water Diversion and Use 8770 is located in the SE 1/4 of NE 1/4 of Section 18, T39N, R2W, MDB&M. According to our records, however, you divert water at the three following locations, none of which is located in Section 18:

Statement 8770

Point of Diversion: NE 1/4 of NE 1/4 of Section 24,, T39N, R3W, MDB&M

Source: Spring Meadow Creek Tributary to McCloud River.

Statement 8771

Point of Diversion: NW 1/4 of NE 1/4 of Section 24,, T39N, R3W, MDB&M

Source: Squaw Valley Creek

Statement 8772

Point of Diversion: SW 1/4 of NW 1/4 of Section 25, T39N, R3W, MDB&M

Source: Squaw Valley Creek

In reviewing the separate map you originally submitted, it appears that three diversions are located close to the gravel pit in Section 18. In view of the information included on the enclosed copies of Statements 8770, 8771, and 8772, we are uncertain where your points of diversion actually are located. We therefore are enclosing three Xeroxes of the 15-minute Shoeinhorse Mountain USGS quad and ask that you locate a separate point of diversion and place of use on each map, as well as any dam, reservoir, and main conduit, as applicable. Then please fill in the diversion information at the bottom of the map, date, and sign it in the "Drawn by" box.

SURNAME
DWR 540 (REV. 78)

Mr. McCoach et al.

-2-

JULY 1 1986

You will note the quad lists an unnamed stream in Sections 18 and 24 tributary to Squaw Creek, but no Spring Meadow Creek or Meadow Creek in these sections. If this is the locally-known name for this source, it should be identified as an unnamed stream (aka the locally-known name).

You are granted 15 days from the date of this letter to return the completed maps and to advise us the amount of water you believe must be bypassed and the season during which it must be bypassed. If you do not respond to this request within the 15-day period, we will presume you do not wish to pursue your vested rights' protest.

The information you have provided on the reverse side of your protest is a continuation of your allegation that this proposed project will harm your vested rights. Your protest based on environmental considerations, public trust, public interest, and other issues therefore is rejected.

If you have any questions about these matters, please contact Cay Chandler at (916) 324-5713.

Sincerely,

Dear Mr. Walter W. Bourez:

There has never been a diversion or interferences in the natural flow of Spring Creek above our diversions that we reported to you. The map you sent us is incorrect. If you would care to come up and walk it we would be glad to show it to you. Our family and the families before us has relied on this water for domestic and irrigation use since before 1914.

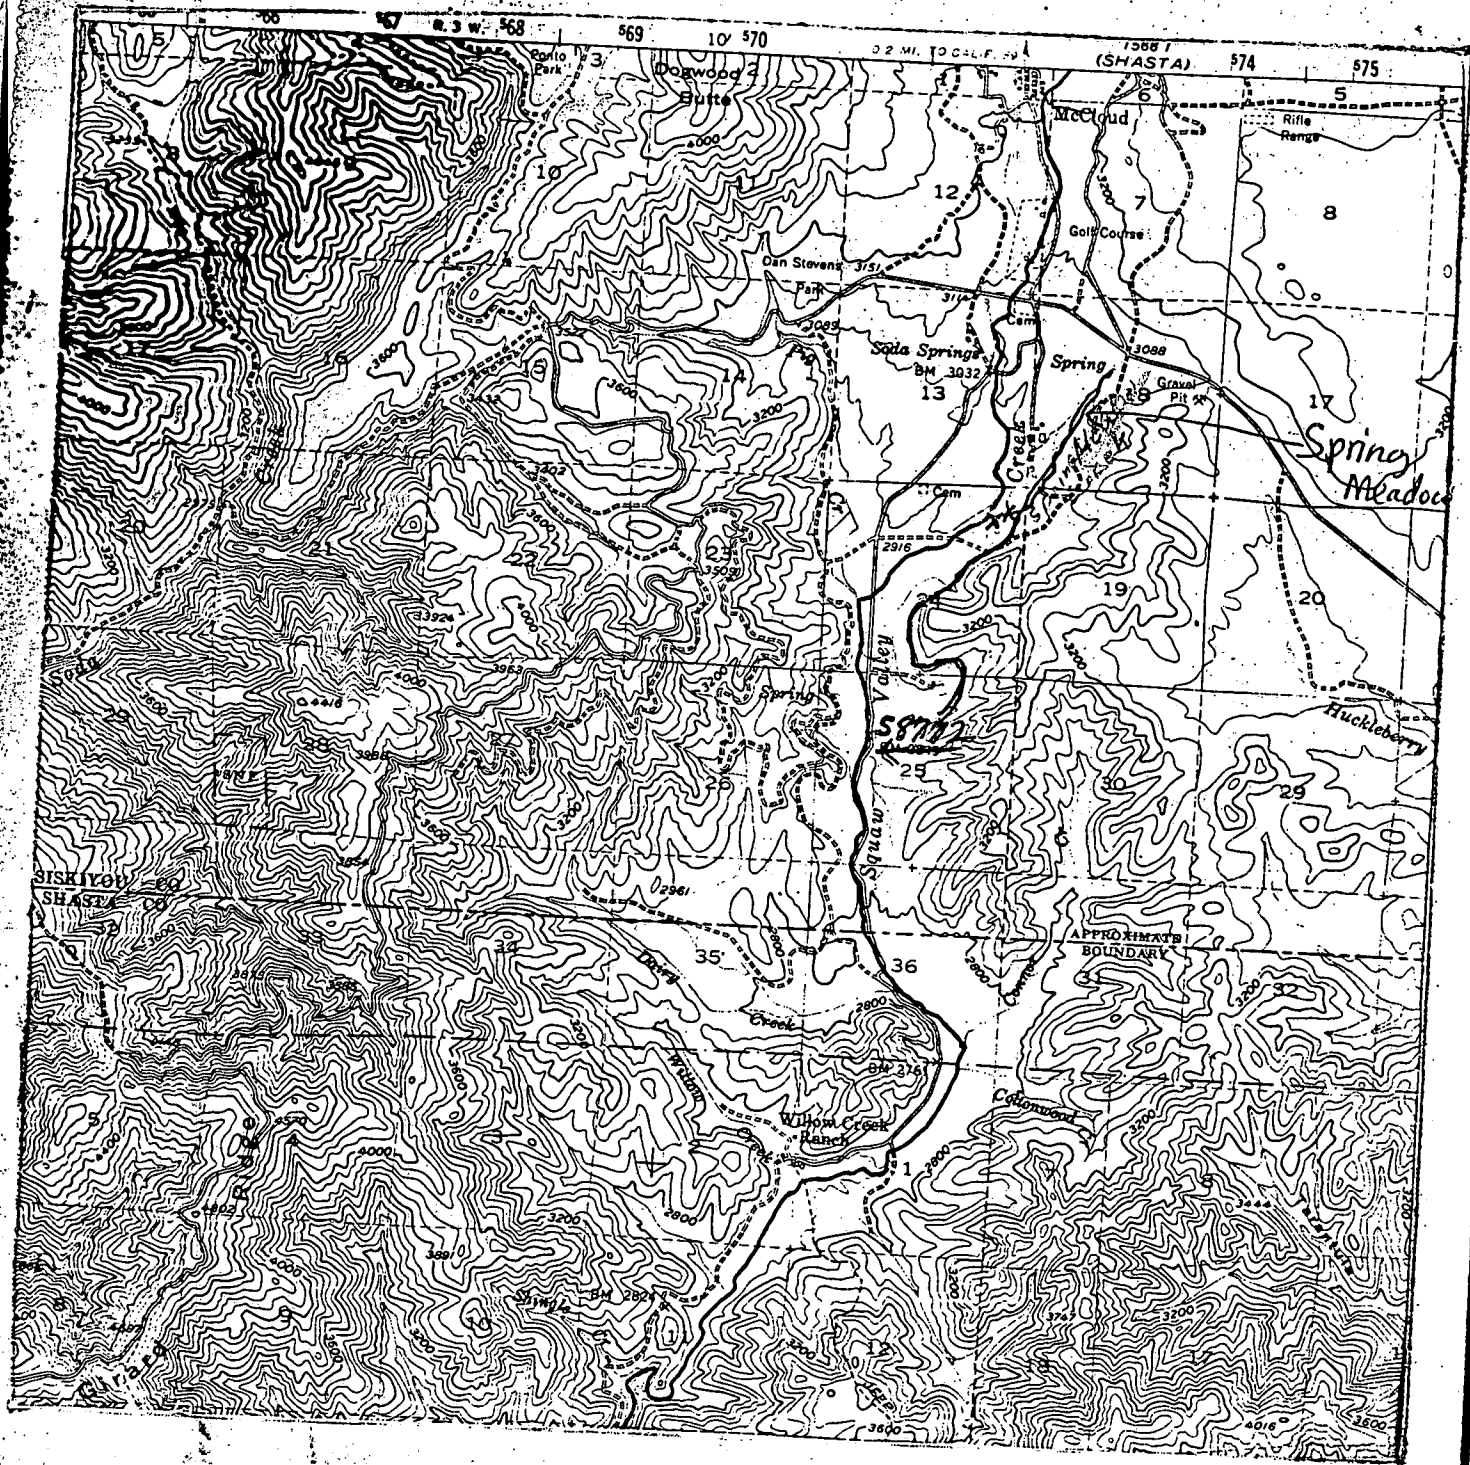

We went up and investigated and the water Mike needs is not going to be taken from Boy Scout Spring but from another spring that has nothing to do with our water.

Thank you for keeping us informed.

Edward E. McCoach

STATEMENT OF WATER DIVERSION AND USE

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water Silas H. Johnson and Edward E. McCoach
 Address Box 819 McCloud, California 2914 Shasta View Drive Redding, Calif. 96001

B. Name of body of water at point of diversion Squaw Creek
 Tributary to McCloud River

C. Place of diversion SW 1/4 NW 1/4 Section 25 Township 39N Range 3W MD B&M, Siskiyou County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Cattle Ranch

E. Capacity of diversion works 24" culvert 6.8 cfs cubic feet per second
 Capacity of storage reservoir — gallons per minute
 State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1975				✓	✓	✓	✓	✓	✓	✓	✓		

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.
320 acres pasture

Maximum annual water use in recent years all but seepage gallons
 Minimum annual water use in recent years all but seepage gallons
 Type of diversion facility: gravity ☒, pump ☒ dirt non-galvanized gate

Method of measurement: weir ☐, flume ☒, electric power meter ☐, water meter ☐, estimate ☒

F. Purpose of use (what water is being used for) irrigation for Edward E. McCoach, Robert Friday and Eva Story

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
5 1/2 of Sec. 25 east of Squaw Valley Rd., 39N, 3W MDEB, Sec. 36 east of Squaw Valley Rd.

H. Year of first use as nearly as known 1900-1909 water use was established.

I. Name of person filing statement Silas H. Johnson and Edward E. McCoach

Position Rancher Organization Johnson Ranch

Address 2914 Shasta View Drive, Redding, California 96001

I declare under penalty of perjury that the above is true and correct to the best of my knowledge and belief.
